MINUTES OF THE PRE BID MEETING

	Vendor Queries	Committee Response	
a.	No. of Patients Per Month has not been provided in the bidding documents which is ambiguous. The hospital should specify & fixed the No. of Patients per month and if incase the No. of patients were below / decreased from the fixed No. of patients, the hospital will bear the deficient No.'s and will pay to the company	No. of Patients cannot be fixed by the hospital. The company may conduct a survey for the patient flow for MRI Scan. Per Patient cost workout is the own responsibility of vendor. Hospital would not bear any cost.	
b.	Profit sharing ratio has been set 40:60 where the investment is wholly from the company side and will provide services to the patients of the hospital therefore, no profit will be shared with the hospital	Instead of the profit sharing ratio, the company will quote their prices per scan in which no profit will be shared with the hospital, but the hospital reserves the right to add markup on the quoted price of the company as share of the hospital and may increase the rate as well. The rates can be increased by the hospital after 2, 3 or 5 years.	
с.	Contract agreement period in the bidding documents is 5 years only. Agreement should be for the period of 10 years	Contract agreement will be for the period of 10 years.

d.	A clause is mentioned in the bidding documents that both parties (Hospital and vendor) will decide the Per Scan Cost of the MRI. This point may be removed as Per Scan Cost is to be submitted in the financial bid by the vendor	The said clause will be removed from the bidding documents.
----	---	---

- The committee further communicated the following points to the participants.
 - 1. The hospital will provide a list of MRI scan in the bidding documents and the firm will quote all the MRI Scans.
 - 2. The hospital will mention 10 most tested MRI scans in the bidding documents and financial evaluation will be done on the average of these 10 most tested scans.
 - 3. Both parties will set the per test cost of scans every year according to the market rate and dollar fluctuation.
 - 4. Building will be depreciated as per government formula of depreciation (10% per year) & after 10 years building will be property of the hospital & after 10 years, if incase the contract extended with the firm, the hospital will charge rent for the building from the firm per square foot.
